

ONLINE BAKERY

OBJECTIVE : Setting up a Website to sell Bakery food items on the Internet.

DESCRIPTION :

To sell bakery food items on the internet so that customer can buy it online rather than visiting a store.

There are various tabs on the webpage for different types of bakery items to buys. You can add your goods to cart and shop for other goods.

ROLE : There will be two role on the website i.e **ADMIN** and **CUSTOMER**

ADMIN : The admin will be the boss of the site. He/She will have all rights on the Website rather than shopping. He/She will add products on the site or remove items from the website. Change the Price and Description of the product.

CUSTOMER : The customer will be the one who will shop on the site. He/She will buy the product available on the website. He can shop as many product he wants and it to the cart so that he can checkout for all the goods at one time. He/She also has to register to site providing all necessary details.

SPECIFICATION :

Front End :

Bootstrap

HTML

jQuery

Middleware :

Spring
